*"My favorite AED memory was volunteering at a silent auction for Townhouses at the Mandarin on the Strip. Being in AED has given me many diverse experiences that I may not normally find myself in, and being in a 2.2 million dollar townhouse on the Strip and using its bathroom is definitely one for the books!"*

*"After graduation, I plan to recover all the precious sleep and fragments of my soul that I have lost in the past 4 years. I also plan travel a lot while I await to hear back from medical schools. A rejection letter would be much easier to read if I was reading it on the beach!"*

*"My favorite memory of AED is volunteering with the Nevada Blind Children's Foundation (and giving lots of pets to Buddy the service dog!)."*

*"After graduation, I am planning to travel and enjoy having a life before starting medical school in the Fall."*

# Mary McDonough

# Noam Dadon

*"My favorite AED memory is definitely the national conference in DC! I loved learning more about our organization and spending time with E-Board!"*

*"I plan to travel during the spring and attend the UNLV School of Medicine starting next summer."*

*Future plans is to apply to medical school.*

*My favorite moment was volunteering at one of the Operation School Bell events this semester. We were able to play with the kids in the waiting room while they were waiting to be chosen to shop with the other volunteers.*

# Ginger McNamara

# Ashley Degner

Plans: MCAT and travel (feeling like Scotland next year)

Favorite AED Memory: The cat clinic when I was able to spend basically the entire time cuddling kittens. <3

My future plans after graduation is to work a lot more, take care of my mother, and wait patiently for an acceptance.

My favorite AED moment is volunteering for Nevada Blind Children Foundation for the past year. We were able to help children with visual impairments with cooking, reading, and playing games. It is a moment that is a reminder for why I decided to pursue medicine.

"I will be applying in June of 2019. In the meantime, and during the application cycle, I plan on working as a pharmaceutical sales representative in order to save up enough money for applying and general living costs while at medical school. Not only will I be saving up, I'll be able to see the business side of the health field and improve my professional interpersonal skills in the meantime.

Other than every cat clinic (yes, I honestly do love going to them), my favorite A&E memory would have to be doing Relay for Life in the Spring of 2017. I was on the midnight-6am shift, and we all ended up playing games and talking. Even though the wind chilled me to my bones, I fell asleep in the tent and my friend Danielle and I woke up at 6am to everyone and everything packed up and gone. It sounds like a terrible memory, but it was so funny waking up confused, popping out of the tent, and having Jordan standing outside being like "oh hey guys, good morning!"
