# Baylor

AKHAVAN

## LEARN MORE ABOUT BAYLOR!

Hello! My name is Baylor Akhavan and I was born at UMC hospital and lived in Las Vegas for all of my life. Since I was young I knew that I was going to be a doctor, but I had no idea of what the journey would entail. Since I have graduated from high school, I worked as a math and science tutor for high school students while volunteering with AED on the weekends. In 2019, I was able to achieve my EMT-Basic certification and I was hired by MedicWest in the summer of 2020 to help the community against the COVID-19 pandemic. Since then, I have worked towards my EMT-Advanced and I would like to work full-time before I move on to medical school.

## FAVORITE AED MEMORY:

My favorite memory of AED will always be the general meetings, since I get to see all the wonderful people that I have met through volunteering, fundraising, and other events.

## WORDS OF WISDOM:

START EARLY!!! Do not let anyone tell you that it's too early or late to start. Be optimistic and work hard, your professional school will appreciate the effort that you put in and recognize you as a competitive applicant.

# ALBAGHDADI

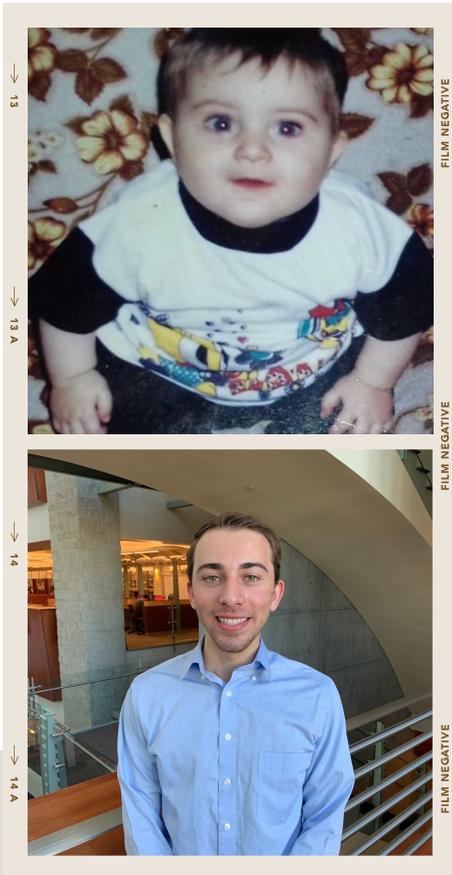

# Motaseem

## LEARN MORE ABOUT MOTASEM!

I am from Syria and I moved to Las Vegas when I was 13 years old. My degree is in biological sciences and I am a first-generation college student. I joined AED when I was a sophomore and held two leadership positions throughout my time in AED. I was an officer for the Fundraising Committee and a chair for the Dental Committee. I am extremely happy and proud that I was able to serve my community as well as thankful for all the people I have met along the way through AED. My future plan is to attend dental school and open up my own practice one day.

## FAVORITE AED MEMORY:

Making hot dogs alongside the Fundraising Committee, leading the dental hygiene drive, and volunteering at LVRM.

# Samantha

GIANNANTONIO

## LEARN MORE ABOUT SAMANTHA!

Hi everyone! My name is Sami, and I am the chair on Animal Welfare Committee (formerly Heaven Can Wait). I enjoyed my 3 years in AED and I will cherish the memories after graduation. Until I hopefully matriculate into veterinary school, I will be working full time as a veterinary nurse at an exotic animal hospital. I love treating patients, with fur, scales, feathers, and spikes, and educating clients about how they can better care for their pets. I hope I can help treat your fur baby one day!

## FAVORITE AED MEMORY:

My favorite memory of AED was my first game night as AED treasurer. I was not only new to the org, but also new to the e-board! It was a welcoming environment and I appreciated everyone who made me feel included. Definitely a night full of laughs!

## WORDS OF WISDOM:

Make sure the path you're on is the one you chose. I thought human medicine was what I wanted, but I think I was just so influenced because all of my friends were pre-med. After much reflection, it turned out that vet medicine was my true passion!

# Esperanza

MIRELES

## LEARN MORE ABOUT ESPERANZA!

Hi everyone, my name is Esperanza Mireles. I finished my degree towards a bachelor's in biochemistry. I have been a part of the AED community since Summer 2018. I took initiative and applied for a leadership position as Historian. I am also an officer for Fundraising Committee. I've tutored students and family members through mathematics and chemistry. My hobbies include Emmeagram personality discussions in EGLV, hanging out with family and friends, and travel. In the future, I plan is to attend medical school with an interest to specialize in neurology and cardiology.

## FAVORITE AED MEMORY:

My favorite memory was volunteering at Opportunity Village for the Christmas Magical Forest. A few members were placed in the food trunks. I was taught how to make deep-fried Oreos, funnel cakes, and churros. We were able to pass the treats out to other volunteers. It was great to experience the inner workings of this event. I would encourage everyone to experience this at least once.

## WORDS OF WISDOM:

Vincent Van Gogh once said, "Great things are not done by impulse, but by a series of small things brought together." All the "checkboxes" shouldn't just be checked off. What you are involved in and what you plan on being involved in, choose it because you want to do it, not just because it's on the list. Take some time to destress. Spend time with family and friends. Make life an adventure, live it to the fullest. Hang in there, only a few classes left.

# NGUYEN *Phuong*

## LEARN MORE ABOUT PHUONG!

Hi! My name is Phuong and I am a senior majoring in Biology. My goal is to attend medical school and become a doctor. In my free time, I like to draw and try out new restaurants and cafes around town. I have been a member with AED since the Fall of 2019. I am also a part of the AED Blood Drive Committee where I was able to meet and work with many great individuals.

## FAVORITE AED MEMORY:

Working at the Blood drives with other committee members

## WORDS OF WISDOM:

Try out as many different volunteering events as you can!  
They are all super fun!

# *Audrey* OTT

## LEARN MORE ABOUT AUDREY!

I am graduating with my BS in Biology with a concentration in Microbiology. I plan to take a year off before going to PA school, become an EMT during that time and continue work in Dr. Wing's research lab. I hope to continue traveling and volunteer with International Medical Relief prior to my admission to PA school.

## FAVORITE AED MEMORY:

In-person volunteering for Opportunity Village and Special Olympics (if you have not volunteered through these organizations, I highly recommend them!)

## WORDS OF WISDOM:

Enjoy your time in college! I know as pre-professional students, we tend to get caught up in grades/school and forget that we are supposed to be enjoying our time here. Do things you want to do, not things that you think will just look good to graduate schools. You might learn some really important things about yourself that in the end, can help with those graduate school applications.

# SEVOIAN *Emma*

## LEARN MORE ABOUT EMMA!

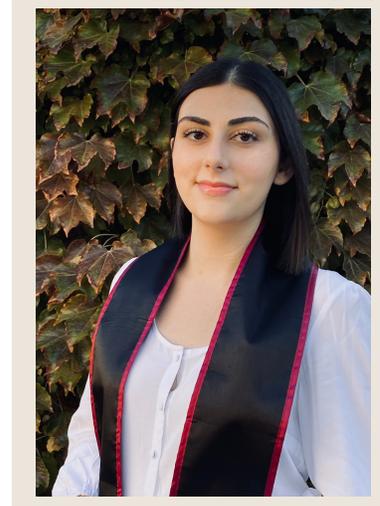

Hello everyone! My name is Emma, and I am a biology major with minors in psychology and neuroscience. I will greatly cherish all of the time that I have spent as an AED member and as the organization's Historian. AED will truly remain one of the most memorable parts of my undergraduate career. After I graduate, I hope to attend medical school and become an endocrinologist. Outside of studying and volunteering, I love to spend my time reading and watching anime (aka crying over fictional characters).

## FAVORITE AED MEMORY:

My favorite AED memory was serving as Historian for the executive board! I really loved working with my fellow board members and getting to meet more AED members. <3

## WORDS OF WISDOM:

Self care is important! Take time out of your day or week to do something that you truly enjoy – I promise that it will make a huge difference in your life!

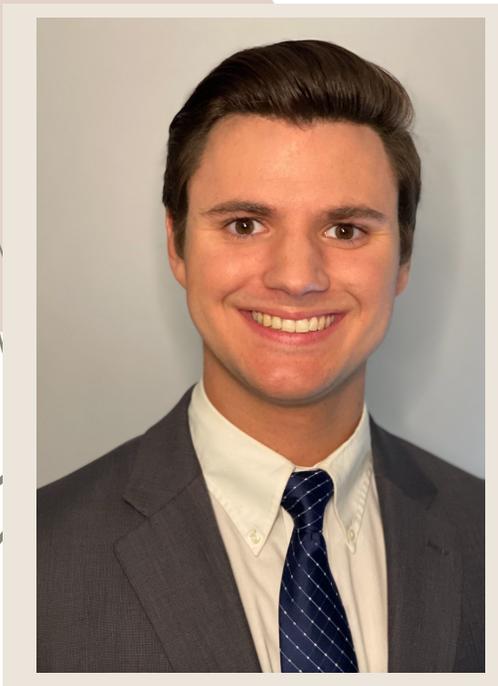

# Stuart WHITE

## LEARN MORE ABOUT STUART!

My name is Stuart White, and I will be graduating with a Bachelor of Science in Kinesiology with a minor in Biological Sciences. I was born and raised in Las Vegas, and some of my hobbies include weightlifting, basketball, volleyball, and disc golf (e.g. frisbee golf). Throughout my university journey, I have had the privilege of working with many different organizations on and off campus, but some of the most memorable have been working with those of you in AED. In the future, I hope to attend medical school, and continue to create everlasting interpersonal connections, such as those I have had with all of you. Thank you for all of the great memories, and I hope to continue to see all of you, as I will remain an officer in the Professional Development Committee as a Post-Bach.

## WORDS OF WISDOM:

Make each day count and remember to enjoy the process. It's not about the destination, its about the journey.
